MAX LITHIUM

The SP Max Drive cordless range is powered by next-gen INR chemistry battery cells. The INR chemistry combines the safety and low resistance of Manganese and the high energy capacity of Nickel. When we combine these cells with Max Core electronics, the result is a battery pack with superior performance and safety or in simple terms, the very best available.

MAX CORE MICROPROCESSORS

The core to the SP Max Drive program are the Max Core microprocessors that offer the ultimate charger to battery to tool interface to improve outright performance. We have embedded microprocessors in all three components to give users longer run times, charge and discharge protection, intelligent current flow and temperature protection.

With SP Max Drive using Max Core technology, we can offer more work time, more power, more recharges and ultimately better performing tools.

SPEED DRIVE

SP **SPEED DRIVE** allows the open end to quickly ratchet fasteners without removing the spanner from the fastener. This design results in much faster bolt and nut removal where only an open end spanner can be used.

SP Tools patented **GEAR DRIVE** spanners are precisely machined with deeper gears for greater torque loading and reliability with 72 teeth that only require 5° of space per turn.

The ratchet head allows the spanner to travel without having the need to remove the spanner from the fastener.
