Isuzu's clutch plate structure features 17 components compared to nine in a popular competitor brand. The cushion plate is an eight piece design, which allows for greater absorption of shock when the transmission and engine are engaging in comparison to many aftermarket product offerings. The idling torsion spring in the spline hub is independent of the hub flange which allows greater absorption of idling vibration.

## SEAT COVERS

Tailored to fit Isuzu models perfectly whilst offer long-lasting protection in all weather conditions to keep your Isuzu truck interior looking its best.
